Made in Shenyang Serve the World

March 20, 2020

Overseas embassies and consulates, sister cities, international business associations and relevant organizations,

As China's heavy industry base, Shenyang is known for its complete range of industries and solid industrial foundation. 37 Shenyang local companies are fully equipped with production capacity on 19 varieties in 7 main categories, namely mobile CT, medical breathing machine, negative pressure ambulance, intelligent thermo detector, rapid detection kit, disinfectant, surgical masks and protective clothing, and have made outstanding contributions to China's fight against COVID-19.

We have received great help and support from all parties in fighting against the epidemic in Shenyang. As a saying goes, we should appreciate and bear in mind the kindness. At present, COVID-19 is spreading globally, which affects the hearts of Shenyang people all the time. Warm and grateful Shenyang people are willing to contribute to the global epidemic prevention with "Shenyang-made" .

As the Tang Dynasty poet, Li Bai's poem goes: "A friend in need is a friend indeed, and it's no good to stand aloof in a crisis". It is hoped that "Shenyang-made" can help countries and regions with difficulties and needs and offer Shenyang's contribution to the battle against the contagion. Let's help each other and go through the hard times, jointly won the victory against the epidemic and welcome the gorgeous spring. Storms always give way to the sun, and we believe our friendship will be even stronger at that time. The hospitable Shenyang people welcome and look forward to your visiting Shenyang, and we sincerely hope that we will strengthen our cooperation and jointly create a prosperous future.

Finally, we wish you good health! And please forward our highest respect to the heroes of all countries and regions fighting the epidemic!

Sincerely,

Shenyang Municipal People's Government

沈阳天眼智云信息科技有限公司

Shenyang Sky-Eye Intelligent Cloud Information Technology Co., LTD.

公司简介

Compony Profile

沈阳天眼智云信息科技有限公司，成立于 2007 年，是以图像处理、智能感知、物联网、大数据等技术为核心的智能技术解决方案提供商，专业从事红外热像温度监测及精准火焰探测、重大装备及危化品运输安全智能管控、变电设备智慧运检、海洋核动力平台智能运维及其他重要区域智慧安防等。为电力、石油化工、交通等领域提供领先的智能安全管控系统及国家公共服务示范平台。

公司是国家高新技术企业、国家中小企业公共服务示范平台、辽宁省装备故障预测与健康管理的专业技术创新中心、辽宁省知识产权优势单位、沈阳市科技小巨人企业等资质荣誉。

红外热像体温自动检测系统是军转民技术产品，该系统是一套高精度、高效率、稳定灵活的非接触式体温筛查系统，具有在线热成像、多目标实时监测、快速部署筛查、实时报警处理、历史事件回溯以及自动报表生成等功能，适用于机场、车站、医院、学校、商场、企事业单位等公共场所，帮助检测人员提高体温筛查效率，控制病毒蔓延，筑起疫情防控的坚固防线。

Shenyang sky-eye intelligent cloud information technology co., LTD., founded in 2007, with image processing, intelligent perception, internet of things, big data technology as the core of intelligent technology solutions provider, specializing in infrared thermal imaging temperature monitoring, precise flame detection, major equipment and hazardous chemical substance intelligent control for security transportation, substation equipment intelligent inspection, marine nuclear power platform intelligent operation, and other important fields of intelligent security protection. It provides the leading intelligent security controlling system and the national public service demonstration platform for electric power, petrochemical, transportation and other fields.

Our company is the national high-tech enterprise, the national public service demonstration platform for small and medium-sized enterprise, Liaoning equipment failure prediction and health management professional technology innovation center, Liaoning intellectual property superiority unit, Shenyang science and technology small giant enterprise and other qualifications.

Infrared thermograph automatic body temperature detection system is the military to civilian technology products, the system is a set of high accuracy, high efficiency, stable and flexible non-contact temperature screening system, has the functions of online thermal imaging, multiple target real-time monitoring, rapid deployment screening , real-time alarm processing, historical events tracing and automatic report generation, applicable to airport, railway station, hospital, school, shopping center, enterprise and public institution and other public places, to improve the efficiency of temperature screening, control the spread of virus, build the strong defenses of epidemic prevention.

沈阳仪表科学研究院有限公司 SAIS Co., Ltd.

公司简介 Company Profile

沈阳仪表科学研究院有限公司是始建于 1961 年 5 月 5 日的国家级科研院所，原隶属于机械工业部，现隶属于中国机械工业集团公司。沈阳仪表科学研究院是国家认定高新技术企业、沈阳市火炬型科研院所、沈阳博士后创业基地、国家博士后科研工作站。公司的“汇博”商标为中国驰名商标、“汇博”产品为沈阳市名牌产品。

沈阳仪表科学研究院汇博光学专业生产精密干涉滤光片，具有五十多年的光学薄膜技术研究历史，技术水平国际先进国内领先。沈阳仪表院汇博光学作为世界上著名的研发各类病毒荧光 PCR 检测设备关键核心器件的专业团队，曾经为成功抗击非典、埃博拉病毒做出过巨大贡献。在抗击新冠病毒肺炎疫情期间，汇博光学迅速研发用于检测的——PCR 荧光滤光片，实时荧光 RT-PCR 可以检测新型冠状病毒核酸，作为确诊、鉴别诊断、出院标准的主要方法。截至目前，我院汇博光学已为累计供应 57400 余件 PCR 荧光滤光片，为搭建疫情防控体系提供了强有力技术支持，为夯实疫情监测体系注入了科技力量。

根据中央联防联控机制部署要求，疫情防控物资调拨需要，我院成功纳入国家、省疫情防控重点保障企业名单，保障了中国疫情物资生产的供应及稳定。

Shenyang Academy of Instrumentation Science Co., Ltd. is a national scientific research institution initially founded in 1961, which was subordinate part of National Ministry of Machine-Industry, and now belongs to China National Machinery Industry Corporation (SINOMACH). The SAIS is a national recognized high-tech enterprise, also known as Shenyang torch type scientific research institute, Shenyang postdoctoral entrepreneurship base and National Postdoctoral research workstation. The company brand "Huibao" is a famous trademark of China, and their product is also famous brand product in Shenyang.

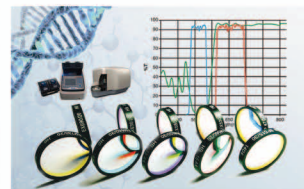

SAIS Co., Ltd. HB Optical who has more than 50 years R&D in the field of optical thin film is a leading manufacturer of precision optical filter. HB Optical as a famous professional team in the world that develops key core devices of all kinds of virus fluorescent PCR detection equipment. The company has made great contributions to the successful fight against SARS and Ebola virus. During the fight against the new corona virus pneumonia epidemic, HB Optical rapidly developed a PCR fluorescent filter for detection, its real-time fluorescent RT-PCR detection of new corona virus nucleic acids as the main method of diagnosis, differential diagnosis, and discharge standards. Up to now, HB Optical has provided more than 57,400 PCR fluorescent filters in total, providing strong technical support for building an epidemic prevention and control system, and contributing scientific and technological strength to consolidate the epidemic monitoring system.

沈阳东泰信息技术有限公司

Shenyang Dongtai Information Technology Development Co., Ltd.

公司简介 Company Profile

DTIT 东泰是一家集研发生产、方案设计、系统集成、运维服务为一体的专注于智慧教育生态体系构建的高新技术企业。

公司具备软、硬件产品研发能力，在疫情爆发之后，依托企业自身优势，迅速组织立项，研发非接触式测温设备，满足大流量人员通过和身份识别，自动生成报表，全程人员信息可追溯以及不同应用场景等需求。企业被列入为沈阳市重点物资生产企业。

DTIT Dongtai is a high-tech enterprise focusing on the construction of a smart education ecosystem that integrates research and development, production, solution design, system integration, and operation and maintenance services.

The corporation has software and hardware product research and development capabilities. After the coronavirus outbreak, relying on the corporation's own advantages, it quickly organized and established projects to develop non-contact temperature measurement equipment to meet the needs of high-traffic personnel and identification, automatic reports generation, personnel information traceable and different demand scenarios. The corporation has been listed as a priority manufacturing enterprise provided the key materials in Shenyang City.

东泰人(证)脸识别体温筛查一体机产品介绍

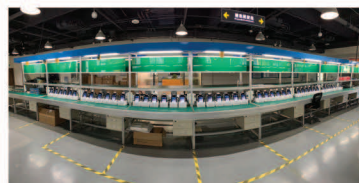

该设备能够实现联网管理，适用于规模较大的商超、门店和其他公共场所以及固定单位，通过身份证或预置人员素材库实现人脸、证卡识别精准匹配体温数据到人。可统一管理客流温度信息，能够记录识别每个人的面部特征和温度，实时生成数据报表，如加装身份证识别设备，联网到公安系统，能够实现全部客流 100% 可追溯。

该产品获得了辽宁省电子信息产品监督检验院关于产品功能的检测报告，软件著作权正在申办。

The Introduction of Dongtai face(card) recognition and body temperature screening all-in-one product

The product can achieve network management, and it is suitable for large-scale supermarkets, stores and other public places and units. It can achieve accurate matching of body temperature data to people through identification cards or preset personnel material libraries. It can uniformly manage the temperature information of passenger flow, record and identify each person's facial features and temperature, and generate data reports in real time. For example, installing an ID card identification device and connecting to the police system can achieve 100% trace of all passenger flows.

The product has obtained the test report on the product function from The Liaoning Electronic Information Product Supervision and Inspection Institute, and the software copyright is being applied for.
